FIGHTERBASE

Ketaleo

Diet guide

Paleo base, low carb, carbs only around training.

Prepared 10 October 2026 for FighterBase members. Eating styles library, one of a set.

DRAFT: not yet reviewed by a registered dietitian. General information only, not medical advice. Check with your doctor or a registered dietitian before changing how you eat, especially if you have a medical condition, are pregnant, or are under 18.

USING FIGHTERBASE

How to use this diet guide

This diet guide is part of your eating styles library in the FighterBase app. The pages that follow are built to be skimmed. You do not need to read it all at once.

1. **Open Nutrition**
   In the app, open the **Nutrition** tab and tap **Eating styles**.

2. **Tap Ketaleo**
   Read the short summary, what to eat, what to go easy on, and what to watch.

3. **Follow it**
   Tap **Follow this style**. Recipes and the Foods list then filter to match, so you only see what fits. You can follow more than one style.

4. **Download the PDFs**
   Use **Full food list** and **Diet guide** to save these to your phone. Handy for the shop or a restaurant.

5. **Log it and train**
   Meals you log count towards your day. Spend your energy on training, not on reading labels.

> Looking for the full list of foods? Download the **Full food list** PDF from the same screen. It names every allowed and avoided food.

THE BASICS

What is Ketaleo?

A paleo-keto blend: paleo foods all day, kept low carb, with carbs eaten only in a window around training.

Where it comes from

Ketaleo blends keto and paleo: very low carbohydrate, high fat, and no dairy, grains, legumes or processed foods. The idea is to keep the whole-food rules of paleo and the fat-burning focus of keto.

The main ideas

1. Carbs stay very low, as in keto.
2. Foods come from the paleo list: meat, fish, eggs, non-starchy vegetables, nuts, seeds, healthy fats.
3. No dairy (butter replaced by ghee or oils in some versions).
4. No grains, legumes, sugar or processed foods.
5. Count net carbs and watch fruit, nuts and hidden starch.

Who it suits

- People who want strict low-carb and a no-dairy approach
- People who react to dairy and grains

> **Talk to your doctor or a registered dietitian first if:**
>
> - You take medication for diabetes, blood pressure or epilepsy
> - You have kidney, liver or gall bladder problems
> - You are pregnant, breastfeeding or under 18
> - You have ever had an eating disorder

TRAINING

Fuel for training

- See the keto notes: expect slower top-end speed during adaptation.
- Hit your protein: eggs, meat and fish do the work.
- Salt and fluids are important.
- Calcium: dairy is out, so use sardines, greens and almonds, and ask about supplements.

> Carbs before and after sessions only. The rest of the day stays low carb.

Nutrients to keep an eye on

Calcium and vitamin D
bones
Where: sardines, kale, almonds, sunlight, supplement

Sodium, potassium, magnesium
muscle function
Where: salt, broth, avocado, leafy greens

Fibre
gut health
Where: non-starchy vegetables, chia, flax

Omega-3
joints and recovery
Where: oily fish, walnuts, flax

Common mistakes

- Not eating enough salt
- Too few vegetables
- Eating too many nuts and losing track of carbs and calories
- No calcium plan

EVERYDAY LIFE

Labels, eating out and swaps

Reading labels

- Hidden carbs: maltodextrin, dextrose, starch
- Hidden dairy: whey, casein, lactose
- Sugar alcohols can count partly towards carbs

Eating out

- Steak or fish with vegetables.
- Ask for olive oil, not butter.
- Skip bread, cheese and sauces.
- Salad with oil and lemon is a safe default.

Easy swaps

Butter	→	Ghee (if allowed), olive oil, avocado oil
Milk	→	Unsweetened almond or coconut milk
Rice	→	Cauliflower rice
Bread	→	Lettuce wrap

PUT IT INTO PRACTICE

A sample week

One way a week could look. Portions and total food depend on you and your training.

	Breakfast	Lunch	Dinner
Mon	Eggs, bacon, avocado	Chicken salad with olive oil	Salmon, asparagus, olive oil
Tue	Eggs, smoked salmon, cucumber	Tuna and avocado salad	Beef stir-fry in coconut oil
Wed	Omelette with spinach	Leftover stir-fry	Chicken thighs, roast broccoli
Thu	Sausages (check), eggs	Prawn and avocado salad	Pork chops, cabbage
Fri	Chia pudding with coconut milk	Egg salad in lettuce cups	Steak, green beans
Sat	Bacon, eggs, tomato	Leftover steak salad	Lamb, courgette
Sun	Full breakfast, no toast	Soup (meat and vegetable)	Roast chicken, greens

Snacks

Boiled eggs · Olives · Macadamias · Avocado · Jerky (no sugar) · Celery and almond butter

Shopping list

Meat, fish, eggs · Non-starchy vegetables · Avocado, olives · Olive oil, coconut oil, ghee (optional) · Nuts and seeds in small amounts · Salt, herbs

GOOD TO KNOW

Questions people ask

Is ketaleo different from keto?

Yes: it cuts dairy and processed foods and sticks to paleo-style foods.

Can I have cheese?

Not on strict ketaleo.

Is it right for athletes?

Same cautions as keto. Test it in training.

For fighters and combat athletes

- **No eating style makes a rapid weight cut safe.** Sweating, fluid restriction and crash diets hurt performance and can be dangerous. Plan any weight cut with a registered sports dietitian and your coach, well before the weigh-in.
- **Fuel the training first.** Hard sparring and conditioning need carbohydrate and enough total food. If a style cuts a food group, have a plan to replace what is lost.
- **Protein across the day.** A common general range for people training hard is about 1.4 to 2.0 g per kg of body weight a day (draft range, to be confirmed by a dietitian).
- **Try changes in training, never in fight week.** Test new foods, supplements and timing well before competition.
- **Under 18, pregnant, or with a medical condition:** get advice from a doctor or dietitian before changing your diet.

FIGHTERBASE

Train. Eat. Recover. Repeat.

Your eating styles library lives in the Nutrition tab. Pick a style, follow it, and get back to training.

DRAFT: not yet reviewed by a registered dietitian. General information only, not medical advice. Check with your doctor or a registered dietitian before changing how you eat, especially if you have a medical condition, are pregnant, or are under 18.
