FIGHTERBASE

Pescatarian

Diet guide

No meat. Fish, eggs and dairy included.

Prepared 10 October 2026 for FighterBase members. Eating styles library, one of a set.

> DRAFT: not yet reviewed by a registered dietitian. General information only, not medical advice. Check with your doctor or a registered dietitian before changing how you eat, especially if you have a medical condition, are pregnant, or are under 18.

USING FIGHTERBASE

How to use this diet guide

This diet guide is part of your eating styles library in the FighterBase app. The pages that follow are built to be skimmed. You do not need to read it all at once.

1. **Open Nutrition**
   In the app, open the **Nutrition** tab and tap **Eating styles**.

2. **Tap Pescatarian**
   Read the short summary, what to eat, what to go easy on, and what to watch.

3. **Follow it**
   Tap **Follow this style**. Recipes and the Foods list then filter to match, so you only see what fits. You can follow more than one style.

4. **Download the PDFs**
   Use **Full food list** and **Diet guide** to save these to your phone. Handy for the shop or a restaurant.

5. **Log it and train**
   Meals you log count towards your day. Spend your energy on training, not on reading labels.

> Looking for the full list of foods? Download the **Full food list** PDF from the same screen. It names every allowed and avoided food.

THE BASICS

What is Pescatarian?

Vegetarian plus fish and seafood. Fish brings complete protein and omega-3 fats, which many fighters like for recovery.

Where it comes from

From the Italian 'pesce' (fish). People who avoid meat and poultry but eat fish and seafood. Usually eggs and dairy are included too.

The main ideas

1. No meat or poultry, including products made from them (gelatine, meat stock).
2. Fish and shellfish are included.
3. Eggs and dairy are normally included.
4. Plants such as beans, lentils, vegetables and wholegrains make up much of the plate.

Who it suits

- People who want to avoid meat for ethical, environmental or health reasons but like fish
- People who want omega-3 from food

> **Talk to your doctor or a registered dietitian first if:**
> - You are pregnant (some fish are limited: shark, swordfish, marlin, and oily fish has a weekly limit)
> - You have a shellfish or fish allergy
> - You are a child or teenager

TRAINING

Fuel for training

- Fish, eggs, dairy, beans and tofu supply protein.
- Rice, potatoes, pasta and oats cover carbs around training.
- Oily fish twice a week supports omega-3 intake.
- Tinned fish is cheap and easy to take to the gym.

> Tuna or salmon with rice after training, eggs or yoghurt at breakfast, oily fish two or three times a week.

Nutrients to keep an eye on

Iron
no red meat
Where: lentils, beans, greens, shellfish, fortified cereals

Vitamin B12
eggs, dairy and fish cover this
Where: fish, eggs, dairy

Omega-3
good with fish in the diet
Where: salmon, mackerel, sardines, herring, trout

Mercury and pollutants
some large fish contain more
Where: vary your fish; limit shark, swordfish, marlin

Common mistakes

- Only eating battered fish and chips
- Too little variety in fish
- Replacing meat with cheese
- Forgetting iron

EVERYDAY LIFE

Labels, eating out and swaps

Reading labels

- Gelatine, animal rennet, meat stock, lard
- Worcestershire sauce contains anchovies (fine for pescatarians)
- Check ready meals for meat extracts

Eating out

- Fish dishes, sushi, seafood pasta, vegetarian curries.
- Check soups and sauces for meat stock.
- Ask about fish sauce and meat-based gravies.

Easy swaps

Chicken	→	Salmon, prawns or eggs
Beef mince	→	Lentils or tinned fish
Bacon	→	Smoked salmon or eggs
Meat stock	→	Vegetable or fish stock

PUT IT INTO PRACTICE

A sample week

One way a week could look. Portions and total food depend on you and your training.

	Breakfast	Lunch	Dinner
Mon	Porridge with berries	Tuna and sweetcorn jacket potato	Baked salmon, rice, broccoli
Tue	Eggs on toast	Prawn and avocado salad	Lentil dahl with rice
Wed	Yoghurt and fruit	Sardines on toast, salad	Cod, potatoes, peas
Thu	Smoked salmon and scrambled eggs	Hummus wrap with veg	Prawn stir-fry with noodles
Fri	Overnight oats	Tuna pasta salad	Bean chilli with rice
Sat	Pancakes with fruit	Fish soup and bread	Mackerel, new potatoes, greens
Sun	Omelette and toast	Leftovers bowl	Fish pie and vegetables

Snacks

Tinned fish and crackers · Boiled eggs · Yoghurt · Fruit and nuts · Hummus and carrots

Shopping list

Fresh, frozen and tinned fish (salmon, mackerel, sardines, tuna) · Prawns · Eggs, yoghurt, cheese · Beans, lentils, tofu · Oats, rice, pasta, potatoes · Vegetables and fruit

GOOD TO KNOW

Questions people ask

Is a pescatarian vegetarian?

No. Vegetarians do not eat fish.

How much oily fish is enough?

UK guidance suggests at least one portion of oily fish a week, and no more than four a week for most adults. Check the guidance if pregnant.

NHS fish and shellfish guidance; British Dietetic Association.

For fighters and combat athletes

- **No eating style makes a rapid weight cut safe.** Sweating, fluid restriction and crash diets hurt performance and can be dangerous. Plan any weight cut with a registered sports dietitian and your coach, well before the weigh-in.
- **Fuel the training first.** Hard sparring and conditioning need carbohydrate and enough total food. If a style cuts a food group, have a plan to replace what is lost.
- **Protein across the day.** A common general range for people training hard is about 1.4 to 2.0 g per kg of body weight a day (draft range, to be confirmed by a dietitian).
- **Try changes in training, never in fight week.** Test new foods, supplements and timing well before competition.
- **Under 18, pregnant, or with a medical condition:** get advice from a doctor or dietitian before changing your diet.

FIGHTERBASE

Train. Eat. Recover. Repeat.

Your eating styles library lives in the Nutrition tab. Pick a style, follow it, and get back to training.
