USING FIGHTERBASE

How to use this food list

This food list is part of your eating styles library in the FighterBase app. The pages that follow are built to be skimmed. You do not need to read it all at once.

1. **Open Nutrition**
   In the app, open the **Nutrition** tab and tap **Eating styles**.

2. **Tap Dairy-free**
   Read the short summary, what to eat, what to go easy on, and what to watch.

3. **Follow it**
   Tap **Follow this style**. Recipes and the Foods list then filter to match, so you only see what fits. You can follow more than one style.

4. **Download the PDFs**
   Use **Full food list** and **Diet guide** to save these to your phone. Handy for the shop or a restaurant.

5. **Log it and train**
   Meals you log count towards your day. Spend your energy on training, not on reading labels.

The big ideas

1. Avoid milk and anything made from it: cheese, butter, cream, yoghurt, ice cream, whey, casein.
2. Replace dairy foods with fortified plant alternatives.
3. Read labels: milk hides in breads, sauces, chocolate, protein powders and processed meats.
4. Lactose-free dairy is not dairy-free: it still contains milk protein.
5. Allergy and intolerance are different: allergy needs strict avoidance and medical advice.

Talk to a professional first if: You think you have a milk allergy (get advice; reactions can be serious); You are pregnant, breastfeeding or under 18; You are cutting out dairy for a baby or child.

Hidden ingredients

Ingredients can hide in the small print. Look for these on packaging, menus and supplements.

- Milk is one of the allergens that must be highlighted in the ingredient list in the UK and EU
- Hidden milk: whey, casein, caseinate, lactose, milk solids, butter fat, ghee, lactalbumin
- Possible traces: 'may contain milk'

For fighters and combat athletes

- **No eating style makes a rapid weight cut safe.** Sweating, fluid restriction and crash diets hurt performance and can be dangerous. Plan any weight cut with a registered sports dietitian and your coach, well before the weigh-in.
- **Fuel the training first.** Hard sparring and conditioning need carbohydrate and enough total food. If a style cuts a food group, have a plan to replace what is lost.
- **Protein across the day.** A common general range for people training hard is about 1.4 to 2.0 g per kg of body weight a day (draft range, to be confirmed by a dietitian).
- **Try changes in training, never in fight week.** Test new foods, supplements and timing well before competition.
- **Under 18, pregnant, or with a medical condition:** get advice from a doctor or dietitian before changing your diet.
